

AIR SALONPAS®

AIR SALONPAS—for relief of acute pain.
A must for all athletes.

An effective pain reliever.

For relief of muscle pain, sprains, joint pain, bruises, backache, muscle fatigue and shoulder pain.

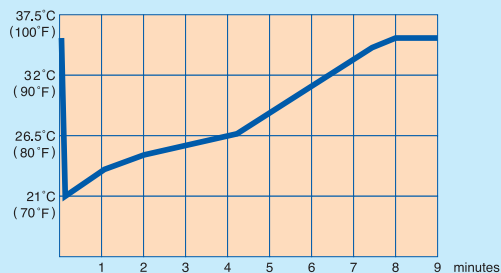

Superb cooling.

AIR SALONPAS cools in addition to providing analgesic action. Evaporation provides a cooling effect for up to 8 minutes.

Cooling Effect

AIR SALONPAS shows an analgesic effect and a local cooling effect. The cooling effect lasts up to 8 minutes after spraying.

Temperature Test

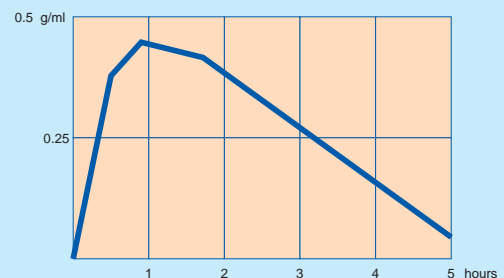

Sensor temperature (20.39°C / 69.08°F) cools after 3 seconds of spraying, returning to previous levels after approximately 8 minutes.

Easing of pain from impact.

Pain relief from the absorption of methyl salicylate through the skin reaches full strength after the cooling effect wears off.

Percutaneous Absorption of Methyl Salicylate (rabbit test)

AIR SALONPAS starts to show its pain relieving effects as the active ingredients are absorbed into the skin.

Blood concentration of methyl salicylate.
